What is this product?

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: This Sub-Fund is passively managed.

The objective of this Sub-Fund is to track the performance of S&P 500 PAB ESG+ Index (the "Index"). The anticipated level of the tracking error, under normal market conditions, is indicated in the prospectus of the Sub-Fund.

S&P 500 PAB ESG+ Index in an equity index that measures the performance of eligible equity securities from the S&P 500 Index (the "Parent Index") selected and weighted to be collectively compatible with a 1.5°C global warming climate scenario. It incorporates a broad range of climate-related objectives covering transition risk, climate change opportunities and physical risks. The Parent Index is an equity index representative of the leading securities traded in the USA. The Index is a net total return index, meaning that dividends net of tax paid by the index constituents are included in the Index return.

The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc.). For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus.

More information about the composition of the Index and its operating rules are available in the prospectus and at: [msci.com](https://www.msci.com)

The Index value is available via Bloomberg SP5HPEUN.

The exposure to the Index will be achieved through a direct replication, mainly by making direct investments in transferable securities and/or other eligible assets representing the Index constituents in a proportion extremely close to their proportion in the Index.

The Investment Manager will be able to use derivatives in order to deal with inflows and outflows and which relate to the Index or constituents of the Index for investment and/or efficient portfolio management. In order to generate additional income to offset its costs, the Sub-Fund may also enter into securities lending operations.

In order to hedge the currency of the share against the currency of the index, the Fund uses a hedging strategy which reduces the impact of changes between the currency of the Index and the currency of the share class.
