## Objective and Investment Policy

The Fund is an index-tracking UCITS passively managed. The investment objective of the Fund is to track both the upward and the downward evolution of MSCI China ESG Selection P-Series Extra Net Total Return Index (the "Index") denominated in US Dollars, while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus. The Index is representative of the performance of large and mid-cap stocks, across the Chinese economy, issued by companies with robust Environmental, Social and Governance (ESG) ratings relative to their sector peers and/or which experienced a yearly improvement in these ESG ratings. Companies whose products or activities have negative social or environmental impacts are excluded from the Index. The Index methodology is constructed using a "Best-in-class approach": best ranked companies are selected to construct the Index. "Best-in-class" is an approach where leading or best-performing investments are selected within a universe, industry sector or class. It excludes companies falling behind on an ESG level, particularly on the basis of ESG ratings. Using such Best-in-class approach, the Index follows an extra-financial approach significantly engaging that permits the reduction by at least 20% of the initial investment universe (expressed in number of issuers). The ESG rating methodology is based on ESG key issues including but not limited to water stress, carbon emissions, labor management or business ethics. Limits of the methodology of the Index are described in the prospectus of the Fund through risk factors, such as the market risk linked to controversies and the risks linked to ESG methodologies and to ESG score computation. The ESG score of companies is calculated by an ESG rating agency, using raw data, models and estimates collected/calculated using methods specific to each provider. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete. Assessment of sustainability risks is complex and may be based on ESG data which is difficult to obtain, incomplete, estimated, out of date and/or otherwise materially inaccurate. Even when identified, there can be no guarantee that these data will be correctly assessed. The Index applies exclusions to companies involved in activities considered non-aligned with the Paris Climate Agreement (coal extraction, oil, etc.). For further information on the exclusions applied by the Index pursuant to the EU Paris-aligned Benchmarks (PAB), please refer to the "Guidelines on funds' names using ESG or sustainability-related terms" section of the Prospectus. Investors' attention is drawn to the specific risks related to investing in the People's Republic of China (PRC) as described in greater detail in the Risk Profiles section of the Prospectus. MSCI's website ([www.msci.com](http://www.msci.com)) contains more detailed information about the MSCI indexes. The Index is a net total return index. A net total return index calculates the performance of the Index constituents on the basis that any dividends or distributions are reinvested net of any withholding tax applicable. The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Index. To optimize the Index replication, the Fund may use a sampling replication strategy. Updated composition of the Fund holdings is available on [www.amundiETF.com](http://www.amundiETF.com). In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

## Performances from 30/09/2016 to 30/09/2026 (Source : Fund Admin)

## Risk indicators (Source: Fund Admin)

|                        | 1 year | 3 years | Inception to date * |
|------------------------|--------|---------|---------------------|
| Portfolio volatility * | 18.00% | 23.64%  | 26.67%              |
| Benchmark volatility   | 18.02% | 23.62%  | 26.71%              |
| Ex-post Tracking Error | 0.14%  | 0.12%   | 2.44%               |
| Sharpe ratio           | -0.84  | 0.14    | 0.07                |

\* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk. The Tracking Error indicator measures the performance's difference between the fund and the benchmark

| Spread    | -0.52%     | -0.05%     | -0.21%     | -0.69%     | -2.69%     | -2.94%     | -46.38%    |

## Calendar year performance\* (Source: Fund Admin)

|           | 2025   | 2024   | 2023    | 2022    | 2021    | 2020   | 2019   | 2018   | 2017   | 2016   |
|-----------|--------|--------|---------|---------|---------|--------|--------|--------|--------|--------|
| Portfolio | 20.02% | 20.55% | -15.91% | -20.47% | -18.04% | -9.18% | 15.38% | -7.11% | 10.97% | 2.60%  |
| Benchmark | 20.83% | 21.48% | -15.31% | -20.02% | -17.33% | -8.12% | 16.79% | -5.92% | 12.48% | 4.04%  |
| Spread    | -0.81% | -0.93% | -0.60%  | -0.44%  | -0.71%  | -1.06% | -1.41% | -1.20% | -1.52% | -1.44% |

\* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

## EQUITY

## Risk Indicator (Source : Fund Admin)

Lower Risk

Higher Risk

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time. The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the MULTI UNITS LUXEMBOURG prospectus.

## EQUITY ■

## Index Data (Source : Amundi)

## Description of the Index

The index is designed to represent the performance of companies that have a robust ESG profile relative to their sector, as well as a positive trend in improving that profile. It is based on the parent index, the MSCI China Index, which covers large and mid-cap stocks of the Chinese economy. Companies from ESG sensitive sectors or whose products or activities have the potential for negative social or environmental impact are excluded. For more information please refer to [www.msci.com](http://www.msci.com).
